Coop Action Plan

Work Term Goal (End point)

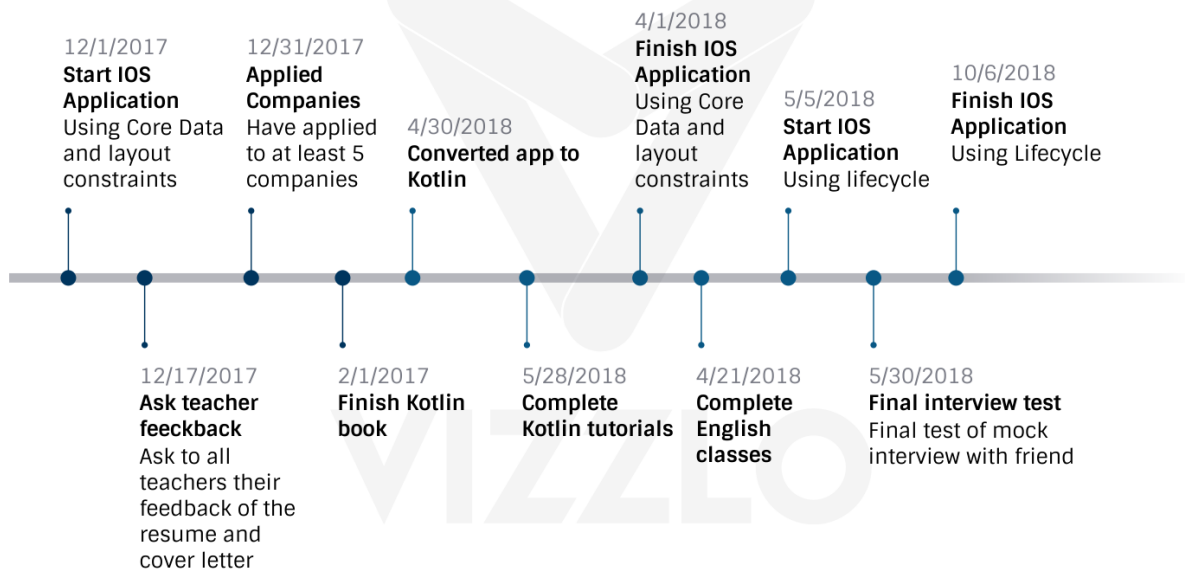

At the beginning of my work term I would like to be working for a bigger company, preferably on the mobile development area which is the area I like the most. A bigger company would bring me more security in the job than I have now which would make me feel less worried about my expenses.

Goals and Objectives

1. Improve english skill for interview process. Achieve a score of at least score 9 in the YMCA english test until the middle of the next year.
 - a. Practice interview with a friend twice a week.
 - b. Watch all the english online classes on the test website.
 - c. Speaking just english.
2. Learn the main IOS components until the middle of 2018 (Database, Architecture, Constraints)
 - a. Build two middle sized application using the main components.
 - b. Read two IOS development book.
 - c. Research and speak with at least four people who work in the area to understand the best way to work.
3. Understand and complete canadian resume and cover letter for at least three different companies until the end of 2017.
 - a. See at least 2 examples per week of resumes and cover letters from people who work in the IT field.
 - b. Ask every college teacher to give their feedback of my documents.
 - c. Apply for at least 1 company per week to listen to their feedbacks and apply it to the documents.
4. Build one android application using Kotlin until June 2018.
 - a. Read one Kotlin book until the end of February.
 - b. Convert a personal application to Kotlin until the end of April.
 - c. Watch to all the Kotlin tutorials on their website until the end of May.

Strategic Planning – Visual Timeline

Goals Timeline

Implementation/Follow up

As defined, me and my partner will meet in a public library once a month for the accountability follow up.
