Tata Consultancy Services (TCS)
Edmond, AB

Dear HR Manager:

Regarding the Software Developer entry level position, please find attached a copy of my resume for your consideration. I have extensive experience in software programming and design and I feel that my professional and educational background will satisfy the requirements of this position.

With a Bachelor's degree in Analysis and Software Development, Postgraduate degree in progress in Mobile Development, and hands-on experience using Java and .Net languages to create and implement software applications, I am confident I will be an asset to your organization.

Having worked within the industry for over 5 years, I have developed a wide range of skills that would meet, and exceed the expectations for the role. In my previous role as a Software Engineer at Samsung we have had many achievements, including published applications on Google Play Store and some directly delivered to the Samsung customers and, in my current role at Geolance I have the opportunity not just to work as a developer but also to manage other developers around the world which makes me understand a lot more about software projects and people roles.

I would relish the opportunity to bring this level of success to your company. If you would like to get in touch to discuss my application and to arrange an interview, I can be reached at anytime via my cell phone, +1 416 505 2097 or via email at pedro92.gf@gmail.com.

Thank you for your time and consideration. I look forward to hearing from you soon.

Sincerely,

Pedro Fernandes.

Pedro Fernandes
